DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

Claim 3 is objected to because of the following informalities: The examiner understands what the applicant is claiming in claim 3 is depicted in figure 6. However the phrase “blocking light at opposite to front side” is awkward and confusing. Either the front side should be defined or the location of the light blocking layer could be recited in simpler terms. For example, the location could be claimed as “behind the retroreflection prism array.” As the claim stands now the light blocking layer could be in front of the screen which would make it very inoperable as a front projection screen. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Brown (U.S. Patent No. 4,012,115). Brown teaches a front projection type screen 10 comprising: a transparent base (col. 3, line 18); a diffusion member 16 formed on one surface of the transparent base; and a retroreflection prism array (13 and see abstract lines 4-5) formed on another surface of the

Art Unit: 2851

transparent base. The applicant is directed to review the abstract, figure 2, and col. 3, lines 15-59. As can be seen in figure 2 the diffusion member comprises oblong shape diffusion factors.

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 2-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 17-22 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher E Mahoney whose telephone number is (703) 305-3475. The examiner can normally be reached on 8:30AM-5PM, Monday-Thursday.
